SUPPLEMENT TO
REPORT NO.

1. The airfield was south of Rogan (36°29'E/49°54'N), Ukrainian SSR, south of the Anarkov (36°15'E/50°00'N) highway, north of the single-track railroad line. The field which, during the war, was occupied by German Air Force was 70 percent destroyed. After the war it was reconstructed and improved.
2. The field, which had a large E-W dimension, was divided into an eastern and a western half in 1948. Fighters and trainers landed in the eastern section, four-engine and commercial planes in the western section. A concrete runway in the center of the landing field was under construction. There were night lighting facilities and a railroad connection.
3. The following buildings were in the eastern section of the field:
 - a. Six new five-story barracks buildings, each about 20 x 25 x 100 meters, each occupied by about 200 men.
 - b. Three solid hangars, each about 25 x 50 x 200 meters (steel and concrete structures), two of which were reconstructed.
4. Flying activities:
 - a. In the western section: Schedule flying with transports, including four-engine planes and 8 to 10 commercial planes every day in the summer months. No flying in winter.
 - b. In the eastern section: Irregular day and night flying, apparently for training purposes, with 10 to 12 obsolete fighters and 8 to 10 biplanes. No parachute jumps were noticed. No flying in winter.

25X1A

Comment:

- a. This is the first post-war report on the Rogan airfield.
- b. The reported location of the field is correct. According to this

information the construction work at the field was apparently not completed at the time of observation.

c. From the reported occupation it is inferred that a training course of a pilot school, possibly from Myanmar, is stationed at the field which is also used by commercial aircraft.
